RE: Manure Management Plan Shell Rock Valley Landscapes, LLC (Finisher #2)

This report is to make you aware of concerns regarding a Manure Management Plan Annual Update received by this office from **Shell Rock Valley Landscapes, LLC (Finisher #2)** formerly **H.E. Trettin, Inc. Finisher #2** swine operation. This report is being submitted according to Resolution 2003-123 **A Resolution Adopting Policy for the Receipt, Review and Comment on Manure Management Plans Received by the Cerro Gordo County Board of Supervisors**. Within seven (7) days of receipt of the manure management plan the Environmental Service Manager shall review the Manure Management Plan and prepare a report to the Board of Supervisors detailing the issues to forward to the Iowa Department of Natural Resources.

The confinement unit is an existing operation that has changed ownership; however, it is not expanding. The operation is located on the Floyd-Cerro Gordo County line at **2256 Zinnia Avenue, Rockford, Iowa in Floyd County**. The capacity of the facility is 3,950 hogs (four finishing barns) with two production cycles per year. The 1,730,100 gallons of annual manure production is a dramatic increase from the previous owner's 377,354 gallons. The manure is stored in earthen structures. **The plan list two fields totaling 234.3 acres; this compares to the preceding plan for this operation of nine (9) fields totaling 437.4 acres.** The two fields are in Sections 25 and 36 of Owen Township. The concerns with the plan are listed below:

- Bird Hill Fossil Preserve is about 1½ mile from the manure application area.
- A grassy waterway cuts across the field in Section 25 of Owen Township.
- Manure production increased from 377,354 to 1,730,100 for no apparent reason.
- Manure is stored in an earthen structure.

If you have any questions regarding this information, feel free to contact this office at (641) 421-9338 or dries@cghealth.com.
